

## IgnoBlox, A Minimalist Font by Paul Hertz

The IgnoBlox font family had its origins in topological designs I experimented in the mid-1990s, the most notable of which was the series *Deadpan*, seventeen digital prints generated with 3D rendering software. *Deadpan* consisted of seventeen slices of toast with bites taken out of them in seventeen topologically distinct ways.

*Deadpan: Ireland (1995)*

IgnoBlox swaps geometric cuts for the topological bites of *Deadpan*: each letterform is derived from a background square with exactly two rectangles removed along an edge or at a corner. The upper case letters in the IgnoBlox family delineate the continuous background shapes. The lower case letters delineate the two rectangles. There are also numbers and some punctuation marks for each weight.

IgnoBlox comes in three weights: Thin, Regular, and Heavy. It is not designed for legibility; on the contrary, it is designed make text into a geometric maze to be deciphered. I am releasing it under a Creative Commons License: The [IgnoBlox Font Family: Regular, Thin, Heavy](#) © 2024 by [Paul Hertz](#) is licensed under [CC BY-NC-SA 4.0](#).

Ignoblox Heavy upper case 48/56, tracking = 50

An abstract graphic consisting of numerous blue geometric shapes, including rectangles, squares, and thin vertical bars, scattered across the white background. The shapes vary in size and orientation, creating a dynamic and modern visual effect.

IgnoBlox Heavy lower case 48/56, tracking = 50

# 得也玩也
